

NILADRI PODDER

SAP AI Architect | Generative AI Lead - South East Asia

[niladri.podder12@gmail.com](mailto:niladri.Podder12@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Seasoned SAP AI Architect and Generative AI Lead with 12+ years of experience spanning enterprise AI, IoT solutions, and cloud architecture. Currently leading AI initiatives across South East Asia, previously drove successful implementations across multiple business lines in India. Expert in architecting and delivering scalable AI solutions on SAP BTP, with deep expertise in Large Language Models, Agentic AI, and IoT protocols (MQTT, LwM2M, LORA). Built and mentored a 45+ member AI team, delivering 10+ enterprise-grade AI solutions across manufacturing, banking, oil & gas, and shared services domains. Proven track record of reducing operational time by up to 75% through intelligent automation and conversational AI interfaces.

PROFESSIONAL EXPERIENCE

SAP AI Architect | AI Lead - South East Asia

2023 - Present

SAP Labs | South East Asia (Previously India)

Leading enterprise AI architecture and solution delivery across South East Asia. Previously led AI initiatives for India with numerous success stories across multiple business lines. Driving adoption of SAP AI services, generative AI, and agentic workflows in customer engagements.

- Currently leading AI initiatives for South East Asia region
- Built and mentored a 45+ member AI team across multiple geographies
- Architected and delivered 10+ enterprise AI solutions across manufacturing, finance, and oil & gas
- Designed AI-powered business process automation solutions reducing operational time by up to 75%
- Drove SAP BTP AI Core and Generative AI Hub adoption across customer base
- Established best practices for RAG, vector search, and agentic AI workflows
- Integrated AI with SAP S/4HANA across inventory, procurement, and finance domains
- Built reusable AI frameworks and accelerators for rapid deployment

Senior Solution Architect | IoT Practice Lead

2021 - 2023

Amazon Web Services (AWS) | India

Led IoT initiatives and solution architecture for 33+ customers across India. Aligned pre-sales, solution design, and customer engagement to deliver end-to-end IoT solutions using AWS services and IoT protocols.

- Headed IoT initiative serving 33+ customers across India
- Led pre-sales and solution design for enterprise IoT deployments
- Architected end-to-end IoT solutions using AWS IoT Core, Greengrass, and analytics services
- Implemented device connectivity using MQTT, CoAP, and HTTP protocols
- Designed sensor integration solutions for industrial IoT deployments
- Awarded as Top Performer in a quarter for exceptional delivery and customer satisfaction
- Designed scalable IoT architectures for manufacturing and industrial sectors

- Implemented device management and monitoring for large-scale deployments

Solution Architect

2018 - 2021

SAP Labs | India

Solution architecture for SAP BTP applications with focus on cloud-native development, integration, and enterprise solutions. Early contributions to AI/ML exploration initiatives.

- Designed enterprise solutions on SAP BTP and Cloud Foundry
- Led integration architecture for S/4HANA Cloud
- Implemented workflow automation using SAP Build
- Mentored development teams on cloud-native practices
- Contributed to early AI/ML exploration initiatives
- Established integration patterns for hybrid landscapes

Technical Architect | IoT Platform Lead

2015 - 2018

BT (British Telecom) | India

Led the development and deployment of BT's IoT Platform, one of the company's biggest wins in the UK market. Architected and delivered enterprise IoT solutions including Smart Office with comprehensive device connectivity using industry-standard IoT protocols.

- Built BT's IoT Platform from ground up, hosted on BT's own infrastructure
- Delivered one of BT's biggest wins in UK market with widespread customer adoption
- Implemented multi-protocol device connectivity (MQTT, LwM2M, HTTP, CoAP)
- Architected and implemented Smart Office solution with sensor integration
- Designed device management framework for thousands of connected devices
- Integrated LORA-based sensors for long-range low-power communications
- Led technical teams in delivering complex IoT and integration solutions
- Established IoT architecture standards and best practices for BT

Senior Software Engineer

2012 - 2015

Tata Consultancy Services (TCS) | India

Software development and technical leadership for banking and financial services clients. Progressed from developer to technical lead roles.

- Developed enterprise applications for banking clients
- Led technical teams and code reviews
- Contributed to architecture and design decisions
- Implemented CI/CD practices and development best practices

TECHNICAL EXPERTISE

AI & Generative AI:

Large Language Models, Generative AI, Agentic AI, LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Vector Search & Embeddings, Prompt Engineering

SAP Ecosystem:

SAP BTP, SAP AI Core, SAP Generative AI Hub, SAP Build Process Automation, SAP Build Apps, SAP HANA Cloud, SAP S/4HANA Integration, OData & REST APIs

IoT & Protocols:

MQTT, LwM2M (Lightweight M2M), LORA (Long Range), CoAP, HTTP/HTTPS for IoT, WebSocket, AMQP, IoT Device Management, Edge Computing, Sensor Integration, IoT Security & Authentication, Device Provisioning & OTA Updates

Backend & Development:

Python, Flask, FastAPI, Streamlit, Java, Spring, REST API Design, Microservices Architecture

Data & Knowledge:

SAP HANA Vector Engine, Neo4j (Knowledge Graphs), FAISS, ChromaDB, Knowledge Graph Design, Vector Databases

Cloud & DevOps:

AWS (IoT Core, Lambda, SageMaker, Kinesis), Microsoft Azure, Docker, Kubernetes, GitHub/Git, SAP BTP Kyma, Cloud Foundry, CI/CD Pipelines, JFrog Artifactory

KEY ACHIEVEMENTS

- Delivered AI solutions reducing operational time by up to 75% across multiple enterprises
- Enabled non-technical users to leverage AI through intuitive conversational interfaces
- Successfully delivered 33+ IoT customer engagements at AWS
- Built BT's IoT Platform serving multiple UK customers, one of BT's biggest wins
- Recognized as Top Performer at AWS for exceptional delivery and customer satisfaction
- Built reusable AI frameworks and accelerators for rapid enterprise deployment
- Established IoT architecture standards and best practices for multiple organizations

CORE COMPETENCIES

Enterprise AI Architecture • Generative AI & LLMs • SAP BTP AI Services • Agentic Workflows • IoT Platform Development • IoT Protocols (MQTT, LwM2M, LORA, CoAP) • Team Leadership & Mentoring • Solution Architecture • Cloud-Native Development • API Design & Integration • Device Management • Edge Computing • RAG & Vector Search
